Business Unit:

Our Company

SMARTJET is a company specialized in the design and marketing of technologically advanced industrial digital inkjet printers that aim to provide a complete and customized solution based on the specific needs of the customer.

Our team includes computer, mechanical and electronic engineers who aim to combine the best of existing technology with innovative ideas in order to fully meet the specific needs of the customer.

The ideal technical partner for the digitalization of your printing process

High performance industrial printing solutions

SMARTJET printing solutions are designed to meet the highest productivity and reliability requirements typical of industrial production lines.

For this reason, our solutions are entirely designed by the SMARTJET Technical Team in collaboration with our best Italian and International partners.

Engineering Know-how

The strong consolidated know-how in the design of complex printing systems allows SMARTJET to respond even to the most challenging printing requirements requested by the market.

The Technical Team has specific skills in the following fields:

- Management of inkjet printing systems based on piezoelectric heads
- Industrial automation
- PLC and software programming
- Fluid and thermal management of printing systems

Customizable products based on customer needs

Through the PERFORMA line, SMARTJET offers a complete customization service for the printing solution based on the specific needs of the customer.

The goal is to provide a solution capable of responding in an optimal manner to the specificities of the client's printing process.

Therefore We are able to provide an **ad hoc solution** in terms of:

- Printing system
- Handling system
- Research and qualification of the inks for the specific customer application

From the Manufacturer to the End-User

All SMARTJET products are entirely designed and assembled in our factory in Fiorano Modenese, Modena.

Thanks to our **direct sales network**, we are able to **directly serve the end user** and thus provide a better listening to the customer's needs and service.

A single technical partner for your digital inkjet printing systems

In addition to the design of high-performance inkjet printing systems, SMARTJET is able to supply functional consumables for printing, spare parts and a total care maintenance service.

SMARTJET therefore proposes itself as a single partner for the supply of:

- High-performance SINGLE PASS inkjet printing system
- Consumable materials for printing
- Spare Parts and Maintenance Service

An Agile Partner for maximum responsiveness in response to customer needs

SMARTJET Product Lines

PERFORMA is the brand that identifies the SINGLE PASS printing machines completely customizable according to the specific needs of the customer.

PERFORMA provides the customer with a customized printing solution with very high printing performance.

It is the ideal solution for digitalizing the printing process on an industrial production line.

FLEX

FLEX

FLEX

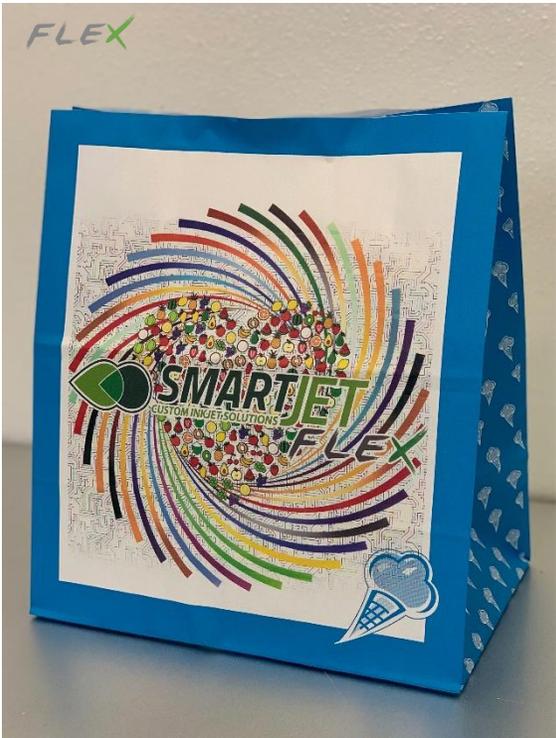

FLEX is the brand that identifies **SINGLE PASS** printing machines for packaging.

FLEX uses water-based inks and is ideal for printing on:

- PAPER,
- CARDBOARD
- WOOD

FLEX

Application

RIGENERA is the brand that identifies machines for regenerating printheads of complex industrial printing solutions.

RIGENERA is characterized by the coexistence in the same machine of:

- Head washing system
- Head testing system

The new SMARTJET division dedicated to consulting and testing activities in the industrial printing sector with inkjet technology.

- The lab

- Drop-Watcher for the effective, rapid development of dedicated *waveforms*
- Internal printer with flexible configuration for rapid sampling
- Curing Systems
- Surface Treatment Systems of print media
- Systems for chemical analysis of the ink
-

- Our services

- Advisory and Training
- Laboratory analysis and testing
- Print setup
